✅ file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/1Customer.feature

Feature: Customer FrontEnd Link Functionality

Background:

✅ **Given** User Launch Chrome browser
✅ **When** user open url "https://phptravels.net/login"
✅ **And** User enters Email as "user@phptravels.com" and password as "demouser"
✅ **And** click Login button
✅ **Then** Page title should be "Dashboard - PHPTRAVELS"

Scenario: Customer Test the Link functionality

✅ **When** user click on My Booking link
✅ **Then** Page title should be "Bookings - PHPTRAVELS"
✅ **And** user click on Add_Funds link
✅ **Then** Page title should be "Add Funds - PHPTRAVELS"
✅ **When** user click on My Profile link
✅ **Then** Page title should be "Profile - PHPTRAVELS"
✅ **And** user click on Logout link
✅ **Then** Page title should be "Login - PHPTRAVELS"

Scenario: Customer make an automated payment of USD Fifty using Paypal

✅ **When** user click on Add_Funds link
✅ **Then** Page title should be "Add Funds - PHPTRAVELS"

- ✅ **And** user can select radio button as pay with paypal
- ✅ **When** user click on paynow button for payment
- ✅ **Then** page for paypal payment url should contain "paypal"

Scenario: Customer check Bookings and Display the Voucher

- ✅ **When** user click on My Booking link
- ✅ **Then** Page title should be "Bookings - PHPTRAVELS"
- ✅ **And** user can check the bookings
- ✅ **When** user can click on view voucher button
- ✅ **Then** download button for voucher is Enable

Scenario: Customer update the Profile

- ✅ **When** user can click on My Profile button
- ✅ **Then** navigate to profile page
- ✅ **And** user can edit the Address as "Trivandrum, Kerala, India"
- ✅ **Then** user read the message as Profile updated successfully.

✅ file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/2Agent.feature

Feature: Agent FrontEnd Link Functionality

Background:

- ✅ **Given** User Launch Chrome browser
- ✅ **When** user open url "https://phptravels.net/login"
- ✅ **And** User enters Email as "agent@phptravels.com" and password as "demoagent"
- ✅ **And** click Login button
- ✅ **Then** Page title should be "Dashboard - PHPTRAVELS"

Scenario: Agent Test SideLink Functionality

- ✅ **When** user click on Agent My booking Link
- ✅ **Then** Page title should be "Bookings - PHPTRAVELS"
- ✅ **When** user click on Agent Add_funds Link
- ✅ **Then** Page title should be "Add Funds - PHPTRAVELS"
- ✅ **When** agent click on My Profile Link
- ✅ **Then** Page title should be "Profile - PHPTRAVELS"
- ✅ **And** user click on Logout
- ✅ **Then** Page title should be "Login - PHPTRAVELS"

Scenario: Agent Test HeaderLink Functionality

- ✅ **When** user click on Hotels Link

- ✅ **Then** Page title should be "Search Hotels - PHPTRAVELS"
- ✅ **When** user click on Flights Link
- ✅ **Then** Page title should be "Search flights - PHPTRAVELS"
- ✅ **And** user click on Visa Link
- ✅ **Then** Page title should be "Submit Visa - PHPTRAVELS"
- ✅ **When** user click on Tours Link
- ✅ **Then** Page title should be "Search Tours - PHPTRAVELS"
- ✅ **And** user click on Blog Link
- ✅ **Then** Page title should be "Blog - PHPTRAVELS"
- ✅ **And** user click on Offers Link
- ✅ **Then** Page title should be "Offers - PHPTRAVELS"
- ✅ **When** user click on Home Logo
- ✅ **Then** Page title should be "PHPTRAVELS | Travel Technology Partner - PHPTRAVELS"

Scenario: Agent Search Hotels by City

- ✅ **When** user click on Hotels Link
- ✅ **Then** Page title should be "Search Hotels - PHPTRAVELS"
- ✅ **When** user can enter "Sin" on city name field
- ✅ **And** click on search button
- ✅ **Then** Page title should be "Hotels in sindal - PHPTRAVELS"

Scenario: Agent Update USD to INR

- ✅ **When** user click on USD dropdown menu
- ✅ **And** user can select INR from dropdowm menu
- ✅ **Then** navigate to home page and user can view INR instead of USD

✓ ✅ file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/3Admin.feature

Feature: Admin BackEnd Link Functionality

Background:

- ✅ **Given** User Launch Chrome browser
- ✅ **When** user open url "https://phptravels.net/admin"
- ✅ **And** admin enters Email as "admin@phptravels.com" and password as "demoadmin"
- ✅ **And** admin click Login button
- ✅ **Then** Page title should be "Dashboard"

Scenario: Admin test the Booking link and display the invoice where payment is successful

- ✅ **When** admin click on Bookings Link
- ✅ **Then** Page title should be "All Bookings View"
- ✅ **And** admin click on paid booking link
- ✅ **Then** Page title should be "paid Bookings View"
- ✅ **When** user click on invoice button
- ✅ **Then** Page title should be "Hotel Invoice - PHPTRAVELS"
- ✅ **Then** user can check the payment status is paid

Scenario: Admin Delete Booking where booking status as cancelled

- ✅ **When** admin click on Cancelled booking Link
- ✅ **Then** Page title should be "cancelled Bookings View"
- ✅ **When** user click on delete button and invoice should be deleted after accepting alert message

Scenario: Admin Change Booking status and verify the count in dashboard

- ✅ **When** admin click on Pending booking Link on dashboard
- ✅ **Then** Page title should be "Pending Bookings View"
- ✅ **And** the count before change the status is verified by admin
- ✅ **And** admin click on booking status pending dropdown and change to confirmed
- ✅ **Then** the count after change the status in dashbord is verified by admin

Scenario: Admin check Website link functionality

- ✅ **When** admin click on Website link
- ✅ **Then** Page title should be "PHPTRAVELS | Travel Technology Partner - PHPTRAVELS"

⌄ ❌ file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/4Supplier.feature

Feature: Supplier BackEnd Link Functionality

Background:

- ✅ **Given** User Launch Chrome browser
- ✅ **When** supplier open url "https://phptravels.net/api/supplier"
- ✅ **And** supplier enters Email as "supplier@phptravels.com" and password as "demosupplier"
- ✅ **And** supplier click Login button
- ✅ **Then** Page title should be "Dashboard"

Scenario: Supplier verify the dashboard view and check the text

✅ **When** supplier enters dashboard and can view Sales Overview and summary text

✅ **Then** supplier can verify the summary text on dashboard

Scenario: Supplier test the dashboard displays the Revenue breakdown

✅ **When** supplier enters dashboard can view Revenue breakdown text

✅ **Then** supplier can verify the revenue text on dashboard

Scenario: Supplier Change the booking status and verify the count in Dashboard

✅ **When** supplier enters dashboard verify the count before changing the booking status

✅ **And** supplier click on pending button on dashboard

✅ **Then** Page title should be "Pending Bookings View"

✅ **And** supplier click on booking status pending dropdown and change to confirmed

✅ **Then** the count after change the status in dashbord is verified by supplier

Scenario: Supplier Verify the Functionality of Flight Link

❌ **When** supplier click on flight link

```
java.lang.AssertionError: Bug
        at org.junit.Assert.fail(Assert.java:89)
        at org.junit.Assert.assertTrue(Assert.java:42)
        at
stepDefinitions.StepDefinition1.supplier_click_on_flight_link(StepDefinition1.java:511)
        at *.supplier click on flight
link(file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/4Supplier.feature:26)
```

🔵 **Then** Page title should be "Flight Management"

Scenario: Supplier Verify the Functionality of Visa Link

❌ **When** supplier click on Visa link

```
java.lang.AssertionError: Bug
        at org.junit.Assert.fail(Assert.java:89)
        at org.junit.Assert.assertTrue(Assert.java:42)
        at
stepDefinitions.StepDefinition1.supplier_click_on_visa_link(StepDefinition1.java:517)
        at *.supplier click on Visa
link(file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/4Supplier.feature:30)
```

🔵 **Then** Page title should be "Visa Management"

Scenario: Supplier Verify the Functionality of Tours Link

✅ **When** supplier click on Tours link

✅ **Then** Page title should be "Tours Management"

Scenario: Supplier Verify the Functionality of Bookings Link

✅ **When** supplier click on Bookings link

❌ **Then** Page title should be "All Bookings View"

```
org.junit.ComparisonFailure: expected:<[All Bookings View]> but was:<[Error]>
        at org.junit.Assert.assertEquals(Assert.java:117)
        at org.junit.Assert.assertEquals(Assert.java:146)
        at
stepDefinitions.StepDefinition1.page_title_should_be(StepDefinition1.java:65)
        at *.Page title should be "All Bookings View"
(file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/4Supplier.feature:39)
```

⌄ ✅ file:///D:/GROUP2/PHP_TRAVELS_DEMO/src/test/resources/Features/5Login.feature

Feature: Login Functionality

Scenario Outline: Customer Front End Login functionality

✅ **Given** User Launch Chrome browser

✅ **When** user open url "https://phptravels.net/login"

✅ **And** users enters Email as "<email>" and password as "<password>"

✅ **And** click Login button

✅ **Then** user Page url should contain "dashboard"

Examples:

	email	password
✅	user1@phptravels.com	demouser
✅	user@phptravels.com	demouser123
✅	user@phptravelscom	demouser123
✅		demouser
✅	user@phptravels.com	
✅		
✅	user@phptravels.com	demouser

Scenario Outline: Agent Front End Login functionality

✅ **Given** User Launch Chrome browser

✅ **When** user open url "https://phptravels.net/login"

✅ **And** users enters Email as "<email>" and password as "<password>"

✅ **And** click Login button

✅ **Then** user Page url should contain "dashboard"

Examples:

	email	password
✅	agent1@phptravels.com	demoagent
✅	agent@phptravels.com	demoagent123
✅	agent@phptravelscom	demoagent123
✅		demoagent
✅	agent@phptravels.com	
✅		
✅	agent@phptravels.com	demoagent

Scenario Outline: Admin Back End Login functionality

- ✅ **Given** User Launch Chrome browser
- ✅ **When** admin open url "https://phptravels.net/admin"
- ✅ **And** admin enters Email as "<email>" and password as "<password>"
- ✅ **And** admin click Login button
- ✅ **Then** admin Page title should contain "Dashboard"

Examples:

	email	password
✅	admin1@phptravels.com	demoadmin
